Your Data Doesn't Care About the Recession -- Economize with Consonus

Consonus' Highly-Available SAS70 Type II compliant Data Centers offer a unique combination of data protection and disaster recovery expertise:

- 99.995% network, cooling, and power uptime SLA
- Secure server and storage colocation
- Data center staffing 24x7x365 to safeguard your critical business information
- Cloud computing capabilities with 24x7x365 system monitoring
- Data storage and backup to prevent data loss against natural disaster, power outages, and physical and network attacks

Add to these capabilities a unique combination of security expertise, best practices in IT consulting, and world-class colocation data centers and you have a virtual hosting service and IT service management partner that ensures your business information is protected, managed, and available on demand.

For a limited time only, you have the opportunity to benefit from Consonus' best-in-class Data Center infrastructure while realizing substantial savings in rack space, power, and bandwidth pricing. We offer power and network redundancy in all our racks as well as 99.995% power and network availability per Consonus' exceptional SLAs.
